

Student: _____

Date: _____

1. Circle each representation below that shows $\frac{1}{2}$.

ANSWER KEY

2. This bar is divided into fifths. Shade in $\frac{3}{5}$.

Draw lines to cut this same length bar into tenths.

Shade in tenths above to complete this statement:

$$\frac{3}{5} = \frac{6}{10}$$

3. Fill in the missing numbers to complete the number sentence.

$$\frac{10}{10} - \frac{3}{10} = \frac{7}{10}$$

4. Complete each representation and number fact so that the models and the number facts match.

ANSWER KEY

$$\frac{1}{5} + \frac{1}{5} + \frac{1}{5} = \frac{\boxed{3}}{\boxed{5}}$$

$$\frac{1}{8} + \frac{\boxed{1}}{\boxed{8}} + \frac{\boxed{1}}{\boxed{8}} + \frac{\boxed{1}}{\boxed{8}} = \frac{\boxed{4}}{\boxed{8}}$$

$$\frac{1}{8} + \frac{\boxed{1}}{\boxed{8}} + \frac{\boxed{1}}{\boxed{8}} = \frac{3}{8}$$

$$\frac{5}{6} - \frac{\boxed{1}}{\boxed{6}} - \frac{\boxed{1}}{\boxed{6}} = \frac{3}{6}$$

4. Lilly and Ben like reading the Goosebumps series of books. Lilly has a set with 8 books in it. She has read 6 of her books. Ben has 4 Goosebumps books in his series. He has read the same fraction of books Lilly has read.

a. How many books has Ben read? 3 books

b. Lilly has read $\frac{\boxed{6}}{\boxed{8}}$ of her Goosebumps books.

Ben has read $\frac{\boxed{3}}{\boxed{4}}$ of his Goosebumps books.

Either fraction is correct for both responses.
