

Name: _____ Date: _____

Draw dot cards that are the same as the cards put together.

Example

1

What amount can be divided into 3 equal groups of 8 dots?

2

What amount can be divided into 5 equal groups of 6 dots?

3

What amount can be divided into 4 equal groups of 5 dots?

Name: _____ Date: _____

Draw jumping dots and numbers that complete the number problem.

Example

63 can be divided into 7 equal jumps. Each jump is 9 long.

1

What number can be divided into 9 equal jumps of 6?

2

What number can be divided into 8 equal jumps of 9?

Name: _____ Date: _____

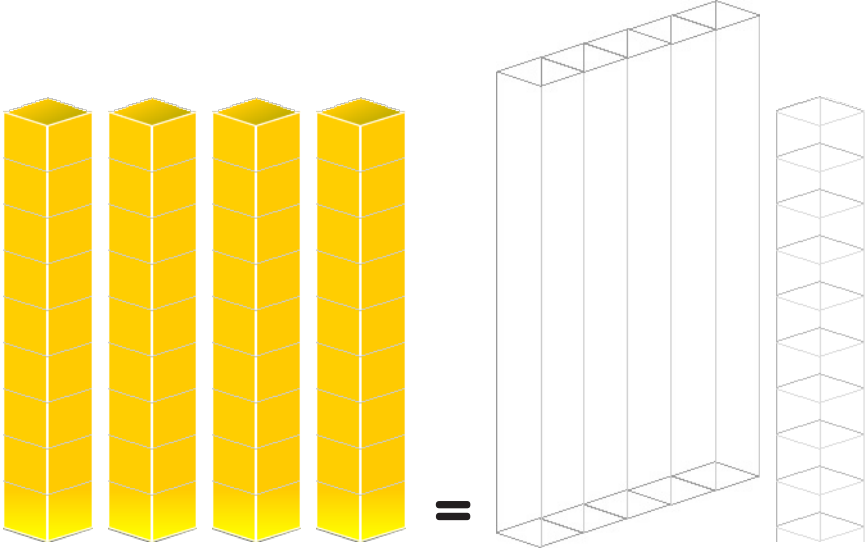

Draw bars that are the same as the bars put together.

Example

48 can be divided into 6 bars. Each bar will be 8 tall.

1

The diagram shows four yellow bars, each 9 units tall. To their right is an equals sign. On the right side of the equals sign, there is a large empty bar divided into 4 equal sections and a smaller empty bar divided into 9 equal sections. This represents the equation $36 \div 4 = 9$.

What number can be divided into 4 bars? Each bar will be 9 tall.

Name: _____ Date: _____

Draw dot cards and numbers to complete the number problem.

Manipulatives and Symbols

1

What amount can be divided into 5 equal groups of 7 dots?

$\div 5 = 7$

2

$\div 5 = 6$

3

$\div 4 = 7$

Name: _____ Date: _____

Draw groups of jumping dots and numbers to complete the number problem.

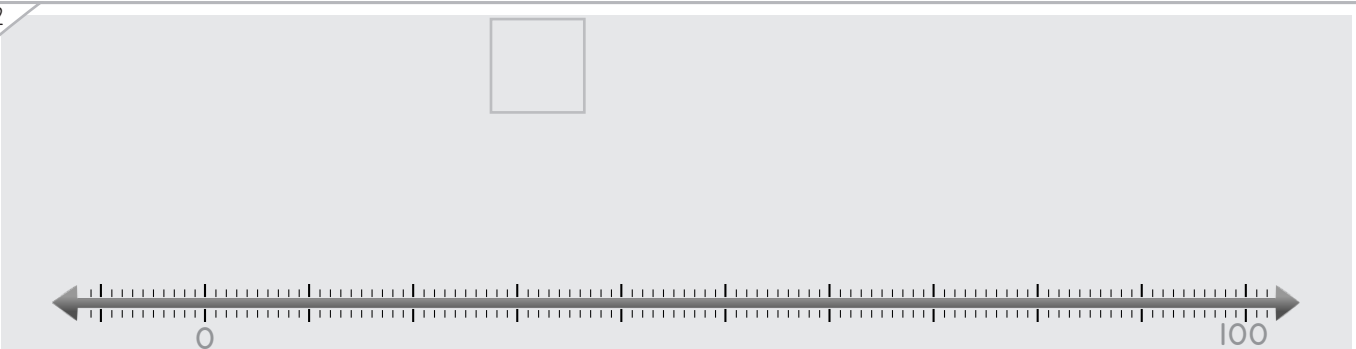

1

What number can be divided into 9 equal jumps of 8?

$$72 \div 9 = 8$$

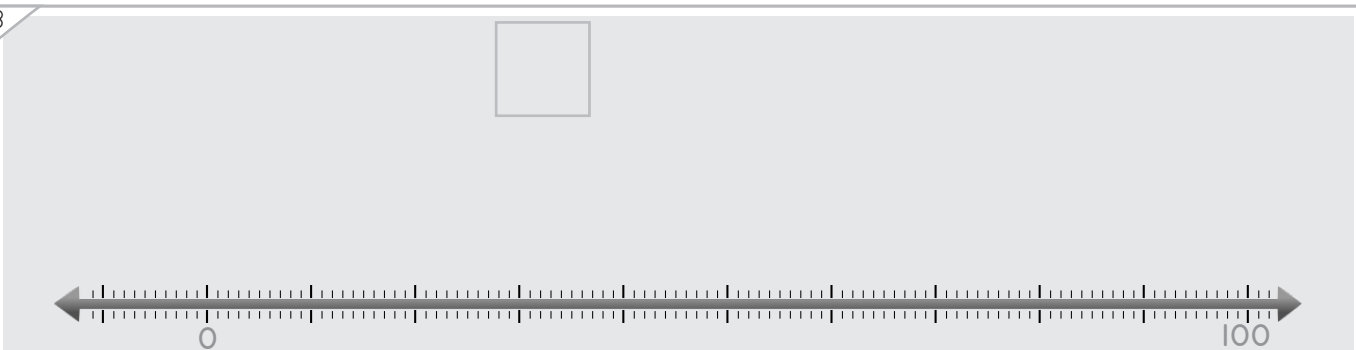

2

What number can be divided into 7 equal jumps of 9?

$$\square \div 7 = 9$$

3

What number can be divided into 8 equal jumps of 8?

$$\square \div 8 = 8$$

Name: _____ Date: _____

Draw bars and numbers to complete the number problem.

Manipulatives and Symbols

1

What amount can be divided into 7 bars? Each bar is 8 tall.

÷ 8 = 7

2

÷ 4 = 9

Name: _____ Date: _____

Symbols

Complete each number fact.

$\square \div 3 = 9$	$9 = \square \div 5$
$\square \div 5 = 6$	$7 = \square \div 3$
$\square \div 7 = 8$	$8 = \square \div 4$
$\square \div 9 = 8$	$4 = \square \div 3$
$\square \div 4 = 7$	$6 = \square \div 7$
$\square \div 8 = 8$	$6 = \square \div 3$
$\square \div 9 = 4$	$8 = \square \div 5$
$\square \div 6 = 7$	$9 = \square \div 6$

Name: _____ Date: _____

Word Problems

Read the story.

Molly picks apples at a farm, and puts them in bags to take home. She put 8 apples in each bag. There are 5 bags. How many apples does she have in all?

Draw dot cards to make a model for the story.

Write a number fact that matches your model.

$$\square \div \square = \square$$

Answer: _____

Name: _____ Date: _____

Read the story.

Sue is sorting a pile of beads. She puts 9 beads in each pile, and there are 8 piles. How many beads does she sort altogether?

Draw dots to make a model for the story.

Write a number fact that matches your model.

$$\square \div \square = \square$$

Answer: _____
