

Draw dot cards to complete the number problem.

Example

Use the 'Standard Algorithm' for subtraction:

Start with the 1s cards.

We can't subtract 8 from 4.

So, we exchange one ten for 10 ones.

Now we have 14 - 8. We can do that! $14 - 8 = 6$

Now we subtract the 10s cards. Again, we

need to exchange one hundred for 10 tens.

Then we have $140 - 50 = 90$.

Last, we subtract the hundreds.

We have a solution: 5 hundreds, 9 tens, and 6 ones.
