

Stage 23: Teacher Reference

Complete the number line and number sentence:

Example A:

$$\square \times \square = \square \text{ or } \square$$

Complete the fraction bar model and number sentence:

Example B:

$$\square \times \square = \square$$

Create Your Own:

Fill in the missing fraction and number below to complete the story:

Michael rides his bicycle every day after school for \square days.

During each ride, Michael drinks $\frac{\square}{\square}$ liters of water.

How many liters of water does he drink in all?

Justify your solution with a model and number sentence.
